LIGHTNING: \$350, Small, focused strike, PWR (3) DEF (N/A)

The screenshot displays a card game interface. At the top, a card store titled "1,000,000 BC Card Store" offers various cards. The store is organized into two rows of cards, each with a price of 90d. The first row includes: EARTHQUAKE (90d 4), MAN (90d 80), MAN (90d 80), LIGHTNING (90d 4), WINDS (90d 11), EARTHQUAKE (90d 4), and three generic cards (90d 90d 90d). The second row includes: three generic cards (90d 90d 90d), COMET (90d 24), and three generic cards (90d 90d 90d). On the left, a player's inventory shows \$900 and a "BEGIN ERA" card (90d). The game board features a central volcano with a red dashed circle around its base. Several small structures with green health bars are scattered across the landscape. A "The Name of 90d" logo is visible in the bottom left corner, and a "VERTIGO GAMES" logo is in the bottom right corner.

Game sucks, don't waste your bills.. Good game, works with Oculus Rift.

but here are some issues

- 1) crazy speed. Need to slow down bowling.
- 2) Ball goes through bat handle.
- 3) Facing position should be customizable. Very uncomfortable batting position for me.
- 4) Batting feedback should be there when knocking the ground and hitting the ball.
- 5) Bat looks like a toy. Bat should be wider, bigger.

6/10 stars, but its the best cricket game that I have seen on vr.. Very nice, but rather short Visual Novel. Took me about 1.5 hours to complete the story once. You follow the story of a detective with his assistant. The detective has a very special character ;)

The story is nice and easy to read. Sometimes I wish the text lines wouldn't stretch over the complete screen but break more often. Would be much easier for the eyes. Also there are a couple of typos starting from about 50% of the story. But that was not a big problem.

Overall a nice game for about 2 hours.. I like this game a lot! but it still needs some of the bugs worked out for sure. like sometimes when the wave spawns it gets stuck way off in the distance and then after that happens once all waves get stuck in same spot after that. I can see this game becoming something good though after bugs fixed and maybe an ability to UPG blocks and add a few new ones to make things more interesting. best game i luv. Great game. But only one problem. **NOBODY PLAYS IT!!!!** It is too good of a game for no one to play it. Cough up 10 bucks people. pls. i cri evry tmie.

The Bad:

The dwarfs walk really slow. They don't get out of each other's way. It's frustrating to try to figure out what stuff you can interact with. The hand-painted normal maps haven't caused the graphics to age very well. The camera jerks around uncontrollably. You can't queue up commands to other dwarfs while one dwarf slowly walks around.

The Good:

The music is cute. It's a complete game, it's not alpha. Except for the tutorial, the ability to read is not required to play it.

Don't get this game unless you are a true fan of the adventure genre and love solving simple puzzles very slowly.. I was waiting for this! I'm glad that it was released already. I immediately bought it as soon as I can. It was a nice read. The length was comparable to the first chapter. If you like being verbally abused by a beautiful half-Japanese tsundere, buy this. You won't regret it.. Very fun looking shooter. Nice skill/weapon progression against an equally progressing inventory of enemies. Graphics are great, and the story is ok.. I didn't make it through 5 minutes of this VN. Why? YOU CANT SAVE DURING CHOICES. What the duece man? Exploring choices is a fundamental part of most VN's these days. All in all, I like the art style, the music is original, and it looks like there was some work put into the game. However, player beware.. A well made Riichi Mahjong game with a good variety of rulesets to choose from. An easy to understand interface with audio and visual indicators make the game accessible even for people new to the game. The customizable color of the tiles and the board make for a good extra touch.

The biggest issue still seems to be just finding people to play the game online, even though the bot support is also available. Speaking of the bots, the AI could be a tad bit better, especially when playing with a mix of bots and real players.

Overall the game was a really nice idea, it's hard to find a proper Riichi Mahjong game in English. Tenhou is a thing, but that's in Japanese only.. Achievements: "COMBAT CAT" and "STREET CAT" seem unattainable. Thus, "COMBAT CAT"(all achievements unlocked) is also unattainable. While not necessarily broken, they require an unreasonable amount of kills in a single run(something that is not tracked!)

- +Unique match-3 mechanics
- +Upgrade system
- +Cute art
- +Addicting
- +Cheap

=Retro aesthetic/music

- 3 unattainable achievements
- Constant border on the edges
- Windowed mode does not get rid of the border

Honestly, it hurts me to not recommend this game. It's a really fun match-3-- er, y'know, 4. It has a cool swapping mechanic that I, personally, have not yet seen. The art style is cute. I love cats. It's a great game. If you don't care about achievements, I'd say go for it. It's a blast. The only major issue besides the achievements is that, even in a window, 2/3 of the playscreen is a large border. If the achievements were fixed, I'd definitely change this review.. I wish there was a Neutral feature on these reviews because that's where it would fall for me, but if I had to I'd say it's not bad so it gets a tentative Positive.

The game plays a lot like the original Genesis games and that is pretty nice, but I had no idea what I was doing. The time travel thing is not explained. The Future/Past mechanic is not explained. The point of the game is not explained. In fact, there is no point at which anything is explained, which should be fine. A Sonic game really should just be "run from start to finish real fast without dying", but this game doesn't do that.

I actually looked it up. I had to Google wtf is up with Sonic CD. This video told me all I needed to know to finally enjoy the game: <https://www.youtube.com/watch?v=HG-mXjr03cQ>

[The game makes the mistake of not telling you your purpose. You see Sonic is trying to make a better future by going into the past. You are supposed to find a machine in each level after travelling to the past by flipping the the Past marker and running at top speed long enough.](#)

I get that it adds a new element of exploration to the game and that can be a lot of fun, but the fact that I had no idea it was even a thing makes the game frustrating and odd.

So, knowing that you are supposed to find this machine, maybe you can enjoy the game more. Maybe I'll pick it up and beat it some day, but the simple fact that the game gives you no indication of this mechanic makes it almost unplayable which is too bad because otherwise I might have really enjoyed it the first time I tried to play.
