ments, unions in the unorganized sector, and movements of dalits and *adivasis* (indigenous people). At the same time it is crucial that a feminist and ecological perspective inform the movements of the organized working class as well.

After a decade of global justice movement discourse critiquing globalization, today Dietrich's analysis does not seem original. But what is most striking about her work is the way, over a decade ago, she synthesized and emphasized the need to address the relationship of religion to politics and the need for a new development model, based on a feminist and ecological perspective with justice for all. Ultimately, what spoke to me,

Written in 1990 at a point in time when India was poised for radical socioeconomic change, this collection of essays reflects on women's participation in the various people's movements of the 1960s and the 1970s. Spearheaded by both the radical left and Gandhian Sarvodaya groups, these political struggles were brutally repressed by the state. Nevertheless, it was in these alternative political forums that the marginalized groups, including women, found a forum to express their political aspirations.

Capturing the synergy of the period, this volume explores women's voices within these different movements. One of the fall-outs of this mobilization of women through various tribal/peasant movements in different parts of the country was that it brought into the open the prevailing systems of sexual exploitation of lower-class/caste women by the landlords.
